

Quest Rubric No: 1		Team 4	
Objective criteria (0/1, 1=met)	Rating	Max	Comments
Servo spins right then left without chatter for at least three times.	1	1	
Alphanumeric display indicates time to activation	1	1	
Display shows countdown time report every second	1	1	
Walker moves forward three steps and stops	1	1	
Adjustable steps setting and step counter	1	1	
Demo delivered at scheduled time	1	1	
Investigative question response	1	1	
Total objective criteria	7	7	
Qualitative criteria	Rating	Max	
Quality of solution	5	5	
Quality of summary readme.md including use of graphics	3	3	Good and well structure report + Nice diagram
Quality of code reporting	2	3	Adding more detail such as diagram, etc. rather than plain text. Comments in code are all good.
Quality of video presentation	3	3	Love the synchronization at the opening of technical video! Good video, detail well explained. For technical video, you can dedicate to talk about your low-level software design (or physical hardware choice) entirely. You don't need to answer investigation question in video. I can look at those from readme.
Total qualitative criteria	13	14	
Quant Weight (75)	75	75	
Qual Weight (25)	23.2	25	
Total Score	98.2	100	
Comments (Just suggestion, it's not the reason for point deducted)			
Excellent work! Excellent readme report! Keep it up! You don't have to include BUID in team quest video (you only need that for individual skills), if it's more convenient to film videos. You can delete comments from template. Also, try to be more organized in creating git branches.
